Student Remarks
good course Good prof
KJ Sir only took classes for a week when Andrew Sir was absent. I really enjoyed those classes
A good model for what a course should be. Good structure, good prof, helpful TAs.
very interesting course. it was taught extremely well
i wish the tutorials were conducted in a more effective manner. tas werent that helpful tbh. they look at the solution and write it and expect us to understand and act as if its way too obvious. krishna sir did tech well, but I hope he doesnt waste time here and there
A good course overall
fun course overall
Sir is GOD of Probability. I love the subject. He built sooo much interest in the subject in me. Thank you very very much sir
very good course
no remarks
excellent prof, course was very interesting, presenting the key ideas in probability without any hassle. lectures were superb. loved it
i believe there should be more digression on the application of probability on detection signal processing. stuff like MAP was discussed but that was the end of it, i wouldve liked some more discussion on how noise is dealt with etc.
Not a fan of probability in general, but enjoyed this course. it was taught well, and tutorials were done well also. Probably wont take another course in the topic, but it was fun while it lasted. Cheers
