Student Remarks

The course was very interesting. It would have been better if we had stuck to Oppenheim right from the start instead of Lathi.
Instructor was very effective in imparting the physical intuition behind all the math which made the course very exciting.

Content was manageable.

The professor is very knowledgeable and taught the concepts very well. Overall, the course was conducted well.

Thank you Sir

1) The quantum mechanical aspects of spectroscopy were not dealt properly.

2) Most of the course content stuck into giving a highly qualitative aspect without much mathematical rigour or conceptual understanding.

The professor was exceptional in conveying the course and encouraging the students to appreciate the subtle ideas within every topic. This led to motivation in pursuing the concepts on a more rigorous level. Adequate time was given to all topics and the tutorials were very helpful in helping us understand the applications of the topics taught in class. The quizzes had a high standard and pushed us to our limits. A very well designed and comprehensive course and

after this courses, i really learnt a lot,it forces you to think
thank u to provide this courses
