Student Remarks

Pros about Instructor: Krishna sir.

- 1) He gave wonderful real life examples about Fourier transform.
- 2) He used to take suggestions from students every day using paper slips. this helped a lot.

Prof KJ' s illustrative examples helped in understanding the theory better and his figurative language made the lectures enjoyable.:)

Excellent way of teaching. Glad to have attended half of the course under this prof. Concepts were taught in a very inspiring and interesting manner. Would be glad to take up courses if this prof is handling the course.

Sir, you presented the subject in a very interesting and easy to learn manner. You ensured that we always followed each and every word you spoke in the class. The pace of the classes was really comfortable. I always looked forward to attend your classes. It was a wonderful learning experience!
Thank you Krishna Sir.

The tutorial quizzes as well as the quizzes were not checking whether the student had understood the concept or not but it checked whether the computations were correct or not. For example if in a particular question the concept applied was correct but the calculations were wrong we were not given the marks.

Very good and insightful course. The tutorials were somewhat lukewarm. But other than this the classes of KJ sir was some of the best ive attended. I had lot of fun in this course and hopefully the tutorials are made more interactive to further heighten this courses standards.

Due to time constraint of tutorial tests we may skip steps so as to get to answer soon, which, in no way means that the student is unaware of the solution. This should be kept in mind by the TA's while correcting the answer scripts.

Including examples while teaching was helpful.

Excellent teacher.
